

The HBF Freeway Bike Hike for Asthma is the largest fundraising event for the Asthma Foundation of WA. By fundraising for the Foundation, your efforts and contributions go directly towards providing support and education services to those affected by asthma.

Asthma is a serious disease that rates as a priority for ambulances and is responsible for one death every day in Australia. Your fundraising efforts can drastically change the impact asthma has on our community.

Registrations are open. This year, you will have a unique and online sponsor webpage in which your fundraising efforts will contribute towards making a real difference.

Visit [www.freewaybikehike.com.au](http://www.freewaybikehike.com.au) and click on *Create your fundraising page*. You will set your own target and create a personalised page in which your friends and family can sponsor your ride. This very simple process will take 5 minutes of your time and by fundraising you are helping those living with asthma.

Congratulations to Glenn Swannell who is currently the top fundraiser for the HBF Freeway Bike Hike for Asthma. Glenn created his own fundraising page and through his contacts has managed to raise much needed funds which go directly towards the Asthma Foundation of WA. He says, "I enjoy riding and this was a great way for me to help support the Asthma Foundation of WA and the work it does."

Glenn is only \$60.00 short of his fundraising target. If you want to support Glenn or any other rider simply click on *Sponsor a Participant* and follow the directions. You will help to make a difference to those in WA suffering from asthma.

*Asthma directly impacts more than 225,000 Western Australians. Please assist the Asthma Foundation of WA in helping people breathe better.*
